

Request for High-Resolution Copies of Images from the Noer/Milorganite® Image Collection

Please send me an uncorrected high-resolution (publication grade) TIF of the items listed below:

- Many items within the Image Collection will require dismounting and rescanning for this purpose. This is all manual, one-by-one work, and it will take both time and care.
- Please be sure that items requested are actually available – if there is no thumbnail image showing online, then it is not available at the present time.
- You will receive an invoice to execute this work; after receiving payment, images will be processed on a time-available basis, and delivered as soon as possible via CD mailed to the address below.
- Images will be (approximately) 4000 dpi TIF scans from the 35 mm reversal film originals (in most cases). Copies are provided on a 'best available' scan basis. Remember please that most of these were shot under field conditions over a long time period. Quality may vary substantially!
